

# Metis Company Overview

Metis builds Jack, an AI maintenance copilot that puts expert intelligence in the hands of every technician.

## THE MISSION

The people who kept American production lines running for fifty years are retiring. Metis builds AI agents so the lines keep moving — and the hard-won knowledge stays in the plant.

## WHAT WE BUILD

Jack is a single agent that connects the systems already on your floor — PLC, SCADA, CMMS, ERP, schematics, manuals — and turns them into plain-English answers for the person standing at the machine.

**2.1M**  
UNFILLED JOBS BY 2030

**54 YRS**  
AVG. TECHNICIAN AGE

**16%**  
WORKFORCE UNDER 40

## HOW WE WORK

- On-site from day one — we learn your floor before we build.
- Tailored to your equipment and your veterans' know-how, not a generic factory.
- Live on your line in weeks, with results in 30 days. No rip-and-replace.

*Accelerating American manufacturing — the most advanced AI, in the hands of the people doing the hard work.*
