

Security & Deployment Overview

Tailored to how you run. No rip-and-replace.

DEPLOYMENT MOTION

- On-site — we walk your floor.
- Ingest — PLC, schematics, and history.
- Tailor — built to how you run.
- Live — results in 30 days.

DATA HANDLING

Jack works with the plant systems you already operate. Deployment scope, data residency, and access controls are agreed up front and tailored to your environment.

Live on your line in weeks — not a twelve-month implementation.
